Fast, secure 'swipe-and-go'
'Flex Print Release'
Enhanced security
Monitor, track and report

Improve **security access** **anywhere** on your network with **Flex Secure Print Suite.**

Take control of network-wide document security and device management

Corporate confidentiality, and its implications for business productivity and competitiveness, is now high on the business agenda. Monitor and control device usage and maximise the security of your business information, wherever it is accessed.

SmartDeviceMonitor for Admin Accounting Report Package
Track, control and report device usage to reduce costs.

Enhanced Locked Print NX
Holds documents on chosen Ricoh MFP until released via authentication.

Card Authentication Package
Secure 'swipe-and-go' ID Card Authentication.

Flex Release Server
Holds documents securely and enables users to print them anywhere on the network, wherever the user is.

How To :

- Print quickly and securely anywhere on the network
- Protect confidential documents
- Monitor productivity and control cost

Benefits

Integrated security, access control and reporting

Ricoh's Flex Secure Print Suite offers the complete answer to network-wide document security and centralised device management. Composed of complementary software packages, it offers businesses total efficiency and cost benefits of flexible user access and shared Ricoh Multifunctional Products (MFPs).

Powerful protection for your documents

The Card Authentication Package (CAP) integrates seamlessly with existing ID Card security systems, thus preventing access or duplication of sensitive documents by unauthorised users through a simple, fast and secure 'swipe-and-go' authentication.

Secure access and distribution

Card Authentication Package (CAP) and Enhanced Locked Print NX (ELP NX) combine to provide a secured method for controlling access to the printing and distribution of confidential documents by holding documents on the chosen Ricoh MFP until they are safely unlocked for printing via ID Card authentication.

Flexibility and convenience

The FlexRelease Server allows secure printing anywhere within an organisation, including branch offices by holding documents until the approved user authorises the print.

Smart tools help you reduce costs

With the SmartDeviceMonitor, administrators are able to track device usage and help reduce Total Cost of Ownership by generating detailed reports.

Performance to match your needs

Ricoh's Flex Secure Print Suite is a scalable solution. It can easily manage and monitor devices and document output for businesses in all sizes, from small companies to larger, cost-conscious businesses with over 1,000+ employees.
