Ricoh IWB A-Series

Powerful and Feature-Rich Hardware Design

4K

4K UHD display

This 4K display (3,840 × 2,160) delivers sharp and detailed images. It is equipped with an anti-glare film to suppress the reflection of external light, making it comfortable to view.

20
POINT

20-point multi-touch functionality with a smooth and comfortable operation

Up to 20 simultaneous touch points enable more active collaboration with multiple people writing at the same time. It can work seamlessly with the major operating systems including Windows, Android, Linux, Mac, and Chrome.

Slim bezel design

The stylish and slim design perfectly fits for any room.

Powerful audio

Equipped with a pair of 15 W speakers for clear high-definition audio.

Versatile connectivity with a front-facing interface

Supports a range of interfaces such as HDMI, USB, and the latest USB Type-C. The interface ports are mounted on the front of the IWB to make it easy to connect an external device.

Front-facing hardware buttons

The hardware buttons are mounted on the front and allow intuitive operation for every user.

Auto input detection

The video signal is automatically detected and displayed on the IWB, when you connect an external input device. This lets you quickly cast your PC screen and start working without wasting precious time.

ENERGY STAR® certified

This is an environmentally-friendly ENERGY STAR certified product.

Jabra PanaCast Series

Technology for life's new rhythm.

Jabra GN

Main Features of The Solution

1. Comes with Plug-and-Play app on Android
2. Annotating in meetings/presentations makes multi-way communication more easy to understand and enhances mutual understanding.
3. Make a meeting more interactive, productive, and make decisions faster and smoother.
4. Support multiple video conferencing application platforms.
5. Multiple display modes to suit the meeting room and the number of meeting participants.

EShare

Seamless wireless presentation and collaboration

WPS Office

PC-less office document editor

Make your meetings and classes even more efficient thanks to the ability to display up to four screens at once. Operation of PCs is also available from IWB wirelessly.

The IWB screen can be mirrored to PCs or other mobile devices so you can view the content from the comfort of your own device.

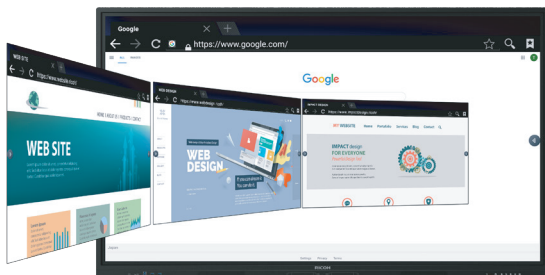

Annotations on documents enhance the level of understanding of participants even during remote meetings. The annotations can be saved for later viewing on your PC.

Main Features of The Solution

Browser

Quick web browsing

You can quickly bring up the web browser during meetings and classes and immediately display your search results on the big screen.

Aptoide

This app store provides a convenient way to install the best software for your needs, such as web conferencing apps.

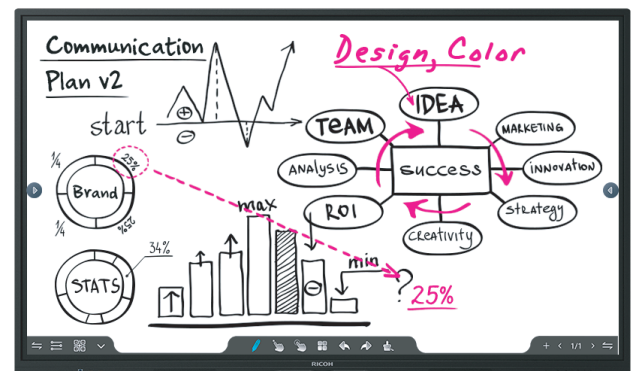

* All downloaded apps are to be used at your own responsibility.

S-write

Easy-to-use digital whiteboard

The digital whiteboard is an excellent tool to maximize collaboration at meetings and classes. The ability to capture the screen of your PC or import images and videos to the whiteboard makes the meeting more smooth and efficient. When the meeting is over, you can save the contents of the meeting to the cloud for future sharing.

Easy-to-use digital whiteboard

Intuitive operation with pen and palm

Effortless sharing of meeting minutes

Multiple people can write on the whiteboard simultaneously for creative collaboration.

Different functions can be assigned to both ends of a pen, allowing multiple people to write in different colors. It is also possible to use your palm to intuitively erase objects.

The whiteboard contents can be saved in the built-in storage or by using a QR code. In addition to this, you can also save it to cloud services such as Google Drive and OneDrive for easy access no matter where you are.

Flexible Functions and Solutions

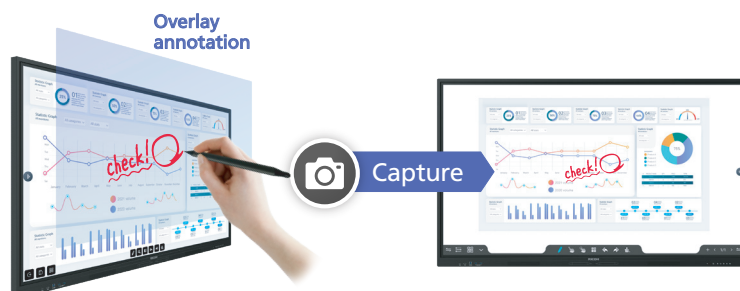

Frustration-free user experience with USB Type-Connection

The included USB Type-C cable allows you to simultaneously send images, pass along touch controls, and supply power to the device all with a single cable. By simply plugging in, you can freely perform operations on your PC directly from the IWB.

Overlay annotation and smooth capture

The embedded annotation tool allows you to annotate on any displayed image. You can easily capture annotations on a displayed image and then paste the image onto the whiteboard. This can then be saved as the meeting minutes after finishing discussions.

Screen sharing with HDMI-out

By outputting the video signal to a large screen such as a projector, your presentation will have a great impact even in large halls. You can also make your presentation smarter through real-time sharing of not only images but also written content.

Effective split screen

The split-screen function lets you run two different apps or display different images side by side. Showing various content on two screens at the same time can significantly improve your meetings and classes.

Useful picture-in-picture function

The picture-in-picture function makes meetings efficient. You can display the installed app such as the whiteboard and external input image simultaneously.

Flexible usage with OPS slot

The optional Windows OPS provides flexible usage for various applications and meets individual requirements, such as the security policy.

RICOH Creative Collaboration for IWB

The RICOH Creative Collaboration for IWB is an all-in-one integrated collaboration solution. It lets you participate in multiple video conferences with a single click and allows wireless sharing of content without the need for any extra apps.

Benefits for customers

1. Organize smart meetings and effective webinar, collaborate creatively.
2. Saving investment costs.

3. Work collaboratively and online meet anytime, anywhere, on any device.
4. Focus on exchange and discussion to help multi-dimensional collaboration with the highest efficiency.
5. Good and stable service quality, ensure your content safety.

6. The net profit result from the Premium Meeting Room Solution in three main parts:

- Profit in system maintenance: Reduce and avoid hardware costs.
- Long-term profits:
 - + Reshape the enterprise collaborative for your working model.
 - + Create highly competitive advantages over competitors.
- Profit from productivity enhancement: Achieve high efficiency working collaboratively for business:
 - + Save working time.
 - + Improve and enhance the speed, workflow and high working efficiency.
 - + Improve connection with customers and customer service.
 - + Improve the quality of services/products for customers.
